sticky sandspurry

## Point Pinos Lighthouse Garden

possible plants a lighthouse keeper might have

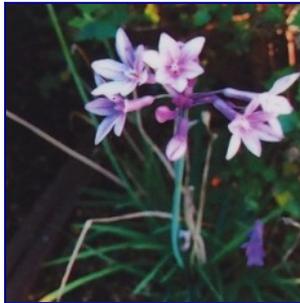

*Anisodonteia hypomandarum* no page on wikipedia see [Anisodonteia](#)

cape mallow

[Euryops pectinatus](#)

yellow daisy

[Tulbaghia violacea](#)

society garlic

*Polygala fruticosa* no page see [Polygala](#)

sweet pea shrub, featherdusters, heart-leaved polygala, ithethe

[Ceanothus griseus](#)

Carmel creeper, Carmel ceanothus

## Trees

### *Cupressus macrocarpa*

(now classed as *Hesperocyparis macrocarpa*), commonly known as Monterey cypress, is a species of cypress native to the Central Coast of California. The native range of the species

during modern times is confined to two small relict populations near Carmel, California, at Cypress Point in Pebble Beach and at Point Lobos. Historically during the peak of the last ice age, Monterey cypress would have likely comprised a much larger forest that extended to the continental shelf.

## Succulents

Scattered in pots around the outside of the Lighthouse.

### *Aloe arborescens* see also Torch Aloe

Native to South Africa, but common along the Pacific Grove coastline.

## Misc

### *Salvia rosmarinus*

commonly known as rosemary, is a woody, perennial herb with fragrant, evergreen, needle-like leaves and white, pink, purple, or blue flowers, native to the Mediterranean region.
