

July 22, 1972

David Roberge, station keeper from Sept 1965 to April 1966. C.O. was Chief Boardman BMC.

Made punch clock rounds to the fog horn every ~~two~~ 2 hours. Saw a lot of deer at night. We had a dog named Rex that lived here and made rounds with us. I found the copper shutter for the original light while hunting for golf balls.

We used to have 2 men run the light, one man every 24 hours. During my off hours I would engineer the 40 footer on search and rescue missions. I slept in the room to left of the stairs, upstairs. I could say lots more but I've got to go.
