	X Altered Unaltere	d l	Moved X	Original Site

The Point Pinos Light Station was constructed and lighted in 1855. The property originally consisted of 25 acres of land, but was later expanded to 75.2. The original buildings were seriously damaged in the earthquake of 1906. The original design was followed, however, the new structure was made of reinforced concrete.

The original property dating to 1855 consisted of the follow ing:

Qtrs & Lighthouse bldg. 1855 - Destroyed 1906, rebuilt 1907 1899 - Now the Station Paint Locker, No change Oil Storage Bldg. to original building 1907 - Demolished 1962 Storehouse 1907 - Demolished 1962 Storehouse 1907 - Relocated back of new Qtrs housing Garage 1939 - Stucco, Tile Peaked roof Station Qurs. 1959 - Stucco, Tile Peaked roof Station Qtrs. 1942 - Demolished 1962 Coastal Lookout 1945 - Concrete construction Fog Signal Bldg.

An additional room was added to the Qtrs & Lighthouse bldg, but except for this the station is quite original. There is presently installed in the light tower a 3rd order lens originally built and ground in France. This light dates back to 1855 and was originally used with Oil lamps.

The station building is presently being maintained as a museum. The light has been automated and is used partially as a radio beacon site. The Coast Guard needs only access to light tower and area where the radio beacon equip. is installed.

Currently the Light Station is being declared excess to the needs of the Coast Guard and has been turned over to General Services Administration for disposal.
