Snoozed

to Ray, Dennis

Sent Drafts 13

Ray: I guess I was not clear about what I wanted from you at our coffee meeting at the Grill. I would like to get a figure at this point and for an hourly figure for your efforts when we call on you in the future. Of course both Dennis and my spending the money that is donated.

More

Thanks for your help.

Ken +

Katherina Hebb Hello, Ken! Knock! Knock! It's the g

to me, Dennis

Monica Cowy Ken, æ!feeling so goodæ! join me

Ok, of course; no charge up to the point of getting the Architect down here. Then I require \$85 per hour. What next? hours. So I think we should sit for one more meeting. I'm open Monday

Ken Hinshaw to Ray

12:00 PM

Ray: that sounds good. Could you come out to the lighthouse Tuesday morning and we can sit down with Dennis.

Message sent.

Cc: Dennis Tarmina <dennistarmina@gmail.com>, Lowell Northrop <LowellNor@aol.com>

in the mean time the two products that I have in mind to coat the metal surfaces where they are in contact with other metals or concrete to keep moisture and oxygen out are:

Prosoco R~Guard Fast Flash or more probably

CIM 1000 Trowel Grade

However, before I recommend either product I would consult with The Architectural firm of Austin Sloat in San Francisco that specialize in exactly these type problems in high rise buildings.

Thank You and I will see you Wednesday

Folks: Just a reminder: we will meet today (Monday) at 2:30 at the orchard to go over all of the unknowns relating to work on the lantern room. We will meet with Carol Ray(?) from Pheonix Iron Works on Wednesday at 5:00 at the lighthouse.
