Hi Dan,

Hope that your week is going well! I am happy to send you Pacific Grove's completed pre-screen assessment. All of your sites look like good candidates for solar, and I'd recommend officially joining the SEED Fund collaborative (of which I don't think you need convincing). Like I mentioned prior, your City Manager will need to sign the attached MOU so that we may continue doing work with you. Feel free to review the report, and let me know if you'd like to schedule a follow-up call to discuss our findings. I look forward to talking to you soon, and receiving the MOU.

Optony is a global research and consulting firm focused on enabling government, utility, and commercial organizations to bridge the gap between clean energy goals and real-world results. By leveraging our independence, domain expertise and unique market position, our clients are empowered to make informed decisions that reduce risks and deliver greater long-term returns on their investments. **Subject:** Point Pinos Lighthouse

Good Afternoon Mr. Hinshaw,

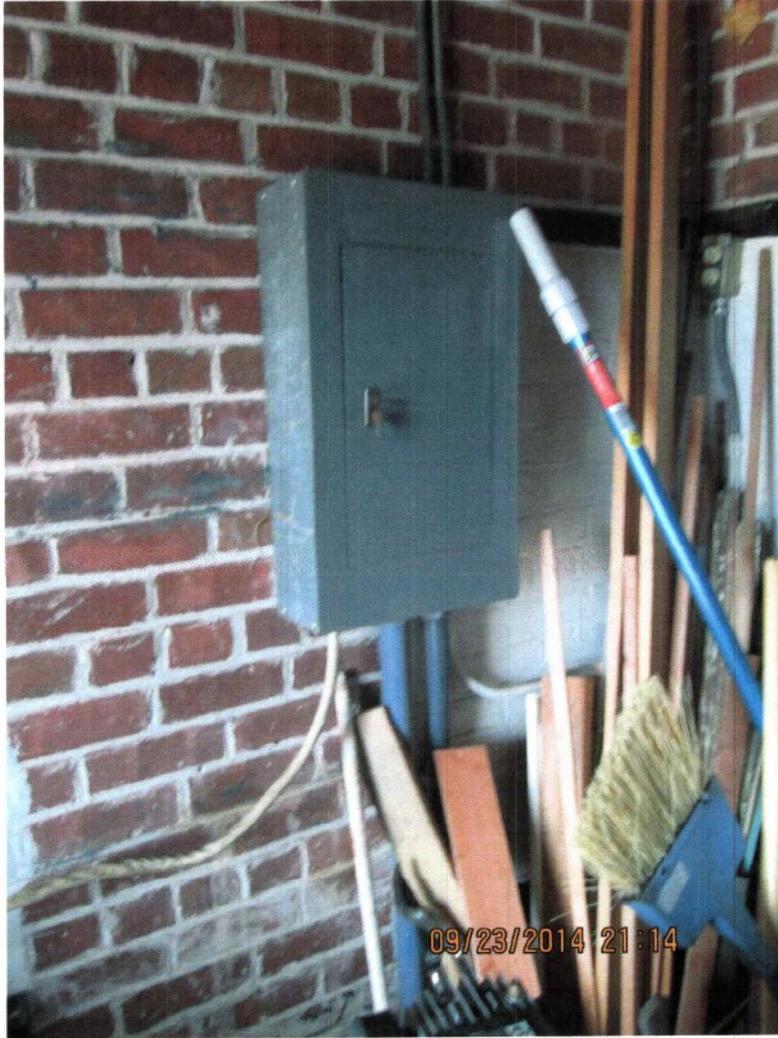

It was good to speak with you this morning. As the Aton Officer for Sector San Francisco, I'll be happy to be of assistance regarding the work that is taking place at Point Pinos.

Have a good afternoon,

-Very Respectfully,

Mickey Price, CWO
